

temptation c

Who would have thought that work and leisure could harmonise so well?

There are desks. And then there's temptation c. So what's the difference? Whilst the former are merely functional, temptation c sets new standards when it comes to modern ergonomic workstations. In temptation c, Sedus has launched a

desk system which brings together design, ergonomics and economy. Various height-adjustment technologies allow the desk to be set to meet individual needs without compromising the clear-cut and aesthetically pleasing design line.

**Great prospects for the coming
business year:
almost unbeatable efficiency.**

A flexible working environment increases productivity. The ergonomic C-frame and 4-leg frame desks from temptation can be freely combined with one another. For example as a workstation or conference system. The clear-cut shape involving

right angles is typical of the entire desk family. temptation c is not only extremely economic but also future-proof! After all, it can be quickly and easily adapted to suit any situation.

Ergonomics versus economics. With temptation c, everyone's a winner.

Sedus temptation c provides a unique approach to customised workstation design which does not detract from the overall look of the office. With the individually adjustable desk top heights, this range makes a valuable contribution to a more pleasant and ergonomic work flow. The cupboards

with full height pull-out drawer not only offer lots of storage space but also act as room dividers with screening and/or acoustic protection. Furthermore, they make ideal convergence points for stand-up meetings.

Sedus temptation c – the intelligent solution: individual workstations can be custom-equipped with the printer shelf, the laptop holder, the PC housing holder, etc. – all within arm's reach.

The perfect control centre. Even when all you want to do is relax.

You don't need a big office to show off temptation c to its best advantage. In an individual office or in a home office, the C-frame desk is an elegant piece of furniture. The attractive design of the freely select-

able worktops and frame components instantly add a sense of quality to any room. The Sedus mobile pedestal not only ensures that things are kept neat and tidy, it also optimises work flows.

Being organised is half the battle when it comes to keeping an eye on what really matters.

The sliding top provides direct access to the cable tray below the desk, fixed desks can be fitted with a fold-down cable tray. On the desk, the cables are either guided through a panel on the side or through a cable management system. The desks also feature a stylish cable grommet and a handy desk-mounted socket outlet. Which means there are now no more excuses for a messy desk.

According to the saying, the state of one's desk reflects the state of one's mind. temptation comes with a clear and tidy cable solution. All cables disappear in the elegant E-Box. And because the system can be accessed easily from above, the quick connection of personal technical equipment is no longer a problem.

Simply twice as much room.

The double workstation with return table is a perfect example of the diverse combinations offered by temptation c. On the one side there is the actual desk and, on the other side, the additional surface can be used for storage. The return tables are robust and can be configured in any number

of ways. Ideal for all those for whom a single workstation is too small. The Sedus cushioned containers are particularly handy for visitors and colleagues; they make a comfortable seat for a spontaneous glance over the shoulder.

With this variation, the return tables can be positioned centrally. As such, users can communicate face-to-face with team members at all times as well as dynamically switch between the computer and meetings.

Good consultation starts at the desk: temptation c has the solution.

With the numerous extension and linking elements, temptation c can be configured to meet all business needs. One of the options is, for example, the classic consultation scenario. In order to switch from the computer to the person to whom you wish to talk to, simply swivel round to face him or her. You no longer need an alternative desk for meetings and, in turn, an uncluttered and harmonious office environment is ensured. The curvature of the desk offers enough surface space for two or three person as well as a relaxed and pleasant atmosphere for meetings.

System adapter. For mounting lights, screens, function bridges, etc.

Monitor bracket. The elegant yet extremely stable monitor bracket guarantees maximum freedom of movement.

Modesty panel. The translucent modesty panel ensures privacy from prying eyes.

Ergonomics begins where functionality ends.

With five different height settings, temptation c provides perfect ergonomics when working. Whichever technology you opt for, alternating postures guarantee that working is kind on the back.

Height-adjustable via telescopic mechanism. Manually adjustable with large adjustment range of **620 to 850 mm**. Advantage: the most cost-efficient height adjustment solution.

Height-adjustable via handle. For multi-user workstations, e.g., for call centres or shared desks. The advantages: simple adjustment (**620 to 850 mm**), no power supply required.

Height-adjustable via gas lift mechanism. Advantages: simple and quick adjustment, adjustment range with standing height from **720 to 1180 mm**, not dependent on power supplies, no costs for stand-by operation.

Motorized height adjustment. Advantages: simple adjustment with power supply, adjustment range with standing height from **720 to 1200 mm**, control optionally available with digital display and memory function for three pre-selected heights.

Motorized height adjustment. Advantages: simple adjustment with power supply, adjustment range with standing height from **650 to 1250 mm**, control optionally available with digital display and memory function (fig. above) for three pre-selected heights.
